SMV WI Software Product Description

SMV WI

KSI offers comprehensive paratransit software for specialized medical vehicle transportation providers in the state of Wisconsin. The administrative burden required to operate and manage this type of business effectively can be sizable. This software is designed to help manage all of the tasks associated with scheduling and billing trips. In particular, by scheduling and recording trips in SMV WI, providers can electronically submit claims to Wisconsin Medicaid with no additional input.

Basic Features

Manage all supporting information including data on provider, drivers, vehicles, recipients, physicians, funding sources, and fee schedules. SMV WI comes preloaded with current Medicaid fee schedules, counties, billing codes, etc.

Schedule one-way, two-way or multi-way trips on a one-time or recurring basis. Trip times may be firm, tentative, or unknown. Schedule in advance or dispatch on the fly. Supports Branch Offices as separate dispatch points with consolidated accounting.

Receive automatic, advanced notification of the expiration of recipient physician certification.

Display or print trip tickets, physician certificates, vehicle inspection forms, and medical care verification forms with or without recipient information.

Assign drivers and vehicles in advance or dispatch drivers and vehicles as needed.

Display or print schedules or trips by date, time, driver, vehicle, service area, or branch office.

On-line mapping support. Locate street addresses with a single click. (Requires an Internet connection.)

Enter trip mileage, times, expenses, and collections from driver logs. Collections may include cash, checks, and tickets. Display or print payroll hours from driver log entries.

Automatically generate detailed, summary, or statement-style invoices for public or private funding sources on a daily, weekly, monthly, or as-needed basis.

HIPPA compliant claims are submitted electronically to Wisconsin Medicaid with no additional input. Or, print claims on pre-printed CMS-1500 paper claim forms.

View complete claims submission error listing, identifying all missing or incorrect information, for easy error correction.

Reconcile cash receipts, tickets, and invoices. Special display for Wisconsin Medicaid duplicates R&S report and estimates reimbursements for easy reconciliation.

Print statements and sales reports.

Enter existing trips and/or invoices for smooth start-up at any time during a fiscal period.

Includes all the latest updates required by Wisconsin Medicaid.

Designed from the start as a Windows 32-bit database application. Supports multiple users over peer-to-peer or client-server networks.

System Requirements

Configuration	Minimum	Recommended
Processor	Pentium-class 500 MHz	Core 2 Duo 1.8 GHz or faster
Memory	64 MB	1 GB or more
Free disk space	100 MB	500 MB or more

Software Maintenance

Maintenance updates to the current version and release will be made available for free download from our Web site as errors are corrected. New feature releases to the current version may be made available for free download from our Web site at our discretion. The timing of the various updates and releases may be dependent on changes made by Wisconsin Medicaid requirements.

Version upgrades may be sold at a discount off the then current price of a new license. Kernel Software, Inc. makes no commitment to the timing, content, or price of such upgrades.

Training and Technical Support

Product installation help is available at no charge. However, no training is included with the purchase of the product beyond the Reference Guide which is provided.

Training and/or technical support is available at a rate of \$65 per hour. Training may be delivered via phone, on-line, or on-site. Technical support is delivered via phone, fax, e-mail, on-line, or on-site. On-line services use remote control software to share an interactive session on your computer. Customers who want on-line services are required to have a modem with a minimum speed of 56 Kbps, Windows XP with Remote Support, and Internet access.

Conversion Services

The base SMV WI product includes the ability to enter manually any existing, open invoices. However, if you already have software (including other programs, databases, spreadsheets, etc.) that contains recipient, physician, trip, etc. data, we offer data conversion services. The cost of these services is \$65 per hour billed on a time-and-materials basis.

Custom Programming

If you require custom modifications to the SMV WI base product, programming services are available at \$65 per hour billed on a time-and-materials basis. All modifications remain the property of Kernel Software, Inc. and may be included in future releases of the base product.
